

## **Corporate Website Statements**

### **Decarbonisation**

WHSSC is committed to taking assertive action to reducing its carbon footprint through mindful commissioning activities. Where possible and taking into account each patient's needs, services are provided close to home, including via digital and virtual access, with a delivery chain for service provision and associated capital that reflects the WHSSC commitment. We support staff considerations and behaviours which have a positive effect on decarbonisation. These include reduced and efficient travel and use of electric vehicles where possible.
